

Learning Journal 26.6.15

The last two weeks have been full of excitement as we dressed up and danced for charity; watched our tadpoles turn into frogs; visited the Centre for Life and flew into space, and watched our baby swallows grow and grow.

Dress up and Dance

Wow! Well done with fabulous dancing costumes. Everyone had a really fun time. We all danced together in the hall to a cheerleading dance routine which had us all glowing and quite tired by the end. We then continued to dance in the classroom at intervals throughout the day to make the most of a fun occasion!

Summer is here despite the changeable weather and we have enjoyed watching plants in our garden finally start to grow. We have also watched some of the creatures around our school grow. Although our swallow's nest is quite high up they are very patient when we photograph their babies with the iPad to see how much they have changed.

In one week they have changed from these strange looking little creatures....

To fluffy, noisy and very cheeky babies who are permanently hungry!

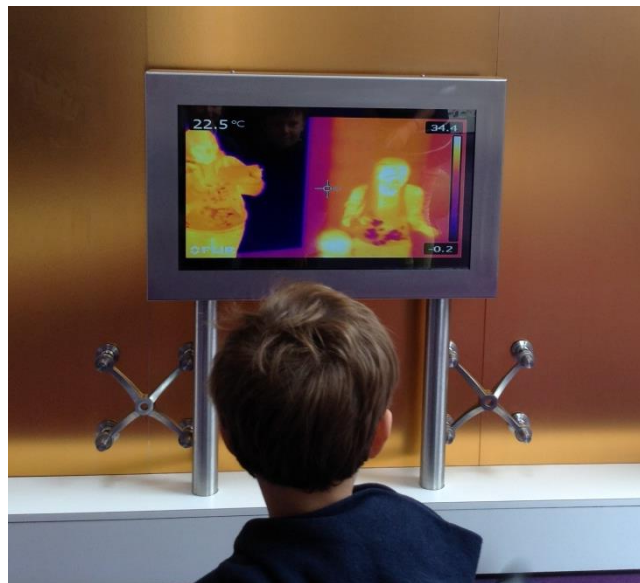

Our tadpoles are also growing very fast and on Wednesday we had *frog day*, when our first baby frog climbed out of the water and hopped onto a stone in the tank. The have been endlessly fascinating and all the staff, as well as the children, can often be found peering into the tank counting frogs. We have listened to some amazing conversations as children discuss the growth and changes they see in the tank.

Our big event on Thursday was our awesome visit to the Centre for Life. I have put the pictures on here and it would be great if you could show these to your child and ask them to tell you about their day.

Your children were so well behaved and sensible all day, despite being really tired at times, and they made us really proud of their good manners and interest in everything they saw. They were a credit to our school and we all had a fantastic day!
